

Why.

LOWER EMISSIONS

You care about your operation's impact on the environment. And you depend on certification from your local air quality board. Did you know that the right duct burner in your combined cycle system will help you with both? Coen's **Power Plus** duct burners will reduce NO_x, CO and VOC emissions to extremely low levels without the need for augmenting air ... even at peak power demand.

The bottom line to you: Today, the **Power Plus** duct burner offers the lowest emissions in the most difficult of operating environments. That's value. That's Coen.

COEN

Clean combustion. Powerful results.
